

# M WALL PROTECT

## Statement

M-Wall Protect is an innovative, efficient and economic wall cladding solution.

M-Wall Protect is a pvc free polycarbonate blend in compliance with the newest european fire rating regulation by EN 13501-1.

M-Wall Protect is specifically developed for evacuation areas and public buildings such as airports, hospitals, schools, musea, shopping malls and others. The fine embossing guarantees easy maintenance, and a low gloss and natural surface impression.

M-Wall Protect is easy to install and can be individual detailed. The surface has a high scratch- and chemical resistance.

The standard sheet material is 2.000 x 3.000 mm which allows optimal sizing and avoids non necessary cutting losses.

## Benefits of M-Wall Protect

- Highest fire rating, B-s, 1, d0
- High Scratch and impact resistance
- Excellent chemical resistance
- Antistatic
- Matt embossing
- Low gloss natural impression
